Description

Blue Rasberry Syrup 1000mg

You are looking for Blue Raspberry Syrup with 1000mg THC. Here's a summary of the options available

- Lime Blue Raspberry Syrup (1000mg): Described as an artisan-crafted, extra-strength syrup with 1000mg THC per bottle. It's tapioca-based, vegan, gluten-free, and contains no high fructose corn syrup. You can create your own infused drinks or enjoy it on its own. This syrup is also available infused with Do-Si-Dos live resin, providing a 10mg serving per 0.6ml.
- Blue Razz Fast Acting Syrup (1000mg): This syrup is nano-emulsified and water-soluble, leading to fast-acting effects (within 10-15 minutes, lasting up to 6-8 hours). It has a refreshing, fruity, tropical, and sweet blue razz taste. It is sweetened with organic blue agave nectar and uses organic MCT oil to carry the THC and strain-specific terpenes. You can take a teaspoon under the tongue or dilute it with a beverage, increasing dosage as needed after 1 hour.

- Smoking Dog THC Syrup Blue Razz (1000mg): Offers a bold, fruity blue raspberry flavor with a refreshing twist, providing a potent and enjoyable experience for relaxation and stress relief.
- Treesap Blue Raspberry Syrup (1000mg) by Cartel Oil Co: This signature THC infused syrup is water-soluble, taking effect in under 10 minutes due to its nano-technology infusion. It comes in a 2oz bottle and is available in 10 flavors.
- Cannavis 1000mg Blue Raspberry Syrup Tincture Box (2pk): This product includes 2 bottles, each with 500mg THC, totaling 1000mg. It is sugar-free, gluten-free, soy-free, and vegan friendly. It comes with a calibrated dropper for easy dosing. Cannavis is known for its multiple award-winning THC and CBD syrups and its commitment to advancements in the cannabis market.
- Cannabull Nano Syrup Blue Raspberry (1000mg): A sativa-hybrid syrup infused with the Blue Dream strain (Blueberry x Haze), known for its euphoric, relaxing, and pain-relieving effects. It is alcohol-free and uses organic blue agave nectar and organic MCT oil. The time-release formula provides effects within 15-20 minutes, lasting over 5 hours.
  Good Vibes Blue Raspberry Fast Acting Syrup (500mg): While not 1000mg, this option is worth mentioning as a fast-acting, low-calorie, and zero-sugar option, according to the vendor, if a lower dosage is desired. It is infused with 500mg of THC per 1oz bottle.
- Enjoy Hemp: Live Rosin Delta 9 THC Syrup / Euphoria Blue Raspberry (420mg): Another lower dose option to consider. This delta-9 THC syrup transforms any beverage into a high-potency, THC-infused, and flavor-enhanced experience. It is vegan, all-natural, and gluten-free, utilizing water-soluble nanotechnology for fast absorption within 15 minutes, lasting 4-8 hours. It is enhanced with live rosin Sativa terpenes for uplifting effects and contains 20mg Delta 9 THC per serving.
