Lemon Glue

- Lemon Glue is typically described as a sativa-dominant hybrid.
- It is a cross of Lemon Tree and Glue 75% (Gorilla Glue #4 x Gorilla Princess).
- Other variations exist, such as Forbidden Lemon Glue (Forbidden Fruit x Lemon Glue) which is indica-dominant.
- Aromas and flavors often feature notes of citrus (especially lemon), gas, and pine.
- Terpenes commonly found in Lemon Glue concentrates include Limonene, Myrcene, and Terpinolene.

THC Content of 89.51%

Lemon Glue is available in various concentrate forms:

- Live Resin: Made from plants that have been kept frozen throughout the extraction process, preserving more terpenes for a flavorful experience.
- One product, Raw Garden Lemon Glue Live Resin, is described as having a "cheery Sativa" effect with lemon and pine aromas.
- Diamonds: Crystalline structures high in THCA, often isolated or mixed with terpene "sauce" for a high-THC experience.
- Truth Dispensary offers Lemon Glue Diamonds Dab with 89.51% THC.
- Live Rosin Jam: A specialized concentrate created with fresh-frozen cannabis flowers and solventless extraction to preserve terpenes and cannabinoids.
