House Blend Cumble Diamonds 90%

Brand: EQ Wellsness CBD
Product Code: House Blend Cumble Diamonds 90%

Price: $0.00

Short Description

House Blend Cumble Diamonds

"Aurora" refers to an indica-dominant cannabis strain, which is a hybrid of Afghani and Northern Lights strains. Aurora Indica is also the basis for various cannabis produWhen you refer to a "House Blend Crumble Diamonds" concentrate, it's likely a mix of two popular cannabis concentrate forms: Crumble and Diamonds.

Here's a breakdown:

- Crumble: This concentrate has a dry, crumbly texture, resembling feta cheese or honeycomb, according to Weedmaps. It's typically made using a solvent-based extraction method and is known for retaining a rich terpene profile, contributing to its flavorful experience. Crumble is often described as potent, with THC levels reaching up to 90%, notes MÜV.
- Diamonds: These are crystalline structures made of nearly pure THCa (tetrahydrocannabinolic acid), the acidic precursor to THC. They look like small, clear gems and are known for their high potency, reaching upwards of 99% THCa. Diamonds are commonly heated (decarboxylated) to convert THCa into THC for a potent high.

THC Content to 90%

House Blend Cumble Diamonds

"Aurora" refers to an indica-dominant cannabis strain, which is a hybrid of Afghani and Northern Lights strains. Aurora Indica is also the basis for various cannabis produWhen you refer to a "House Blend Crumble Diamonds" concentrate, it's likely a mix of two popular cannabis concentrate forms: Crumble and Diamonds.

Here's a breakdown:

- Crumble: This concentrate has a dry, crumbly texture, resembling feta cheese or honeycomb, according to Weedmaps. It's typically made using a solvent-based extraction method and is known for retaining a rich terpene profile, contributing to its flavorful experience. Crumble is often described as potent, with THC levels reaching up to 90%, notes MÜV.
- Diamonds: These are crystalline structures made of nearly pure THCa (tetrahydrocannabinolic acid), the acidic precursor to THC. They look like small, clear gems and are known for their high potency, reaching upwards of 99% THCa. Diamonds are commonly heated (decarboxylated) to convert THCa into THC for a potent high.

THC Content to 90%

The combination: "House Blend Crumble Diamonds"

A "House Blend Crumble Diamonds" concentrate likely combines the best of both worlds:

- Potency: You get the high potency of the THCa diamonds, delivering a powerful and potentially long-lasting effect once heated and converted to THC.
- Flavor and Aroma: The crumble aspect, often infused with live resin, introduces a more robust terpene profile and flavor experience compared to pure diamonds, says Consider It Flowers.
- Texture and Handling: The crumble texture, blended with the micro-diamonds, can be easier to handle and dose compared to pure diamonds or other stickier concentrates

Possible effects and uses

The effects of this concentrate will depend on the specific strain or blend used and your individual tolerance. However, you can generally expect:

- Potent Euphoria and Relaxation: The high THCa content, once heated, provides a strong and potentially intense high.
- Rich Flavor and Aroma: The terpenes in the crumble part will contribute to a more pronounced and enjoyable taste experience.
- Potential Therapeutic Benefits: As mentioned in search result, THCA and other cannabinoids may offer potential benefits like anti-inflammatory properties, neuroprotection, and relief from nausea and anxiety.
- Versatile Consumption Methods: You can dab it, vape it, or even add it to a bowl or joint for an enhanced experience.

In conclusion, "House Blend Crumble Diamonds" likely refers to a potent and flavorful cannabis concentrate that combines the high THCa content of diamonds with the rich terpene profile of crumble for a well-rounded and versatile cannabis experience.
